

# Alarm Exit Hardware

## Features

- 1, 3, 5-minute and continuous alarm type settings available
- ON and OFF power switch
- Alarm sound frequency is 120 db
- Alarm unit has an internal horn. When the push rail is depressed, the horn sounds to provide an audible means of signaling that the door has been opened and breached.
- The key switch to turn alarm off is a standard 1 ¼” cylinder with “C” keyway. The alarm operates on one standard 9-volt transistor battery. When battery is weak the horn will emit an intermittent signal.
- Alarmed units are supplied with a micro switch, which monitors the push rail and the latch bolt and outside trim (if available) for foolproof security on rim devices
- Alarm unit has a signal OC output that can be linked to external alarm control systems
- Easy removal of the alarm unit without the need to dismount the exit device for battery maintenance
- Unit includes “**EMERGENCY EXIT ONLY ALARM WILL SOUND**” decal for application on door or unit

# Electrified Lever Trim

Cal-Royal's electrified lever trim provides remote locking and unlocking capabilities using industry safety standards. The solenoid can be energized from a distant controller, thus allowing access control of the opening. The control of stairwells in high-rise buildings is a common application for this trim, where electric pullback of the exit device's latch bolt is cost prohibitive or not required.

This is especially practical in applications where fire / life safety codes require a "fail-safe" condition which is not an option with electrified latch pullback devices. Because the current draw is quite low there is no need for a more expensive power supply to provide the surge current.

### Features

- Continuous duty solenoids used to insure trouble-free operation
- No hassle 3-Year Warranty
- Requires additional door prep

### Specifications

# (ELR) Electric Latch Retraction

Our motor driven electrified latch pullback exit device allows for remote keyless access control in high occupancy / high traffic conditions where exit devices are required. Common applications include conditions such as hospitals, airports, schools, churches and they are commonly specified in applications that require automatic door openers. The device may be continuously energized allowing for a push / pull condition if desired.

**Features:**

- Available on 2200 Series, including **Rim, Vertical Rod, Concealed Vertical Rod, Mortise Rim Type** fire and non fire-rated exit devices
- MM4 Smart Module: On board diagnostics with audible feedback for adjustment and power issues
- “PTS” (Push to Set Technology): 5 second electronic adjustment for easy post installation adjustment
- Electric dogging rated for continuous duty - Auto retraction if dogged push pad is pulled from position
- Low Current Draw - Field switchable to “High Torque” mode
- Up to 300’ wire run with (2) 18ga wire - Long wire runs provides installer with convenience of placing the locking device power supply in a centralized location; i.e. the same closet as the access panel
- 8’ cable with Quick Connect for MM4 module to easily connect to power supply lead
- 3-year “No Hassle” warranty

**Specifications:**

- Voltage – 24 to 28V DC
- System protection – unit shutdown when voltage exceeds 28V DC
- Average In-rush Current – 900mA; Average Hold Current - 215mA
- PTS adjustment – approx. 1/4”
- Wire run: 300’ with 18ga wire

**INSTALLED ON THE EXIT DEVICE: USE FLR2298 ADD**

**FOR FIELD INSTALLATION USE FLR2298 KIT**

**To Order:**

- **Must Specify: Exit Device item #** and **FLR2298 ADD** as two separate line items. For Example: A2200EO36 US32D with ELR option, order “**A2200EO36 US32D**”, and “**FLR2298 ADD**” as two line items.
- **\*Use FLR2298 KIT if ordered separately.**
- **Optional Switch (RX or LX)** is also available and should be added as a 3<sup>rd</sup> line item as needed.

**Note:** When using electrified hinge, you must use prefix ELELRn + hinge item code, where “n” is equal to number of wires. For example: ELELR4 + BB31.

**MUST USE CRP POWER SUPPLIES TO HONOR WARRANTY (see pages 95-96)**

# Signal Switch RX and LX

**RX** (request to exit) signal switch is used to signal the use of an opening from the push side. When the push pad is depressed, the switch is activated. These devices are equipped with an internal SPDT (single pole double throw) switch that monitors the touch bar. **LX** (latch bolt monitoring) signal switch monitors both egress and access of an opening. When the latch bolt is retracted, the switch is activated. These devices are equipped with an internal SPDT (single pole double throw) switch that monitors the latch bolt position. **LX** and **RX** switches can be combined.

**LX, RX** switches can be used in combination with ELR (electric latch retraction) option.

**Specifications**

**RX or LX**.....Switch rated 0.5 amps @ 24V AC / DC resistive  
 Low current **RX** or **LX**.Switch rated 0.5 amps @ 24V AC / DC resistive

**for Factory Installed. To Order, Specify:**

- RX22/98**.....Request to Exit switch for field installation
- LX2200**.....Latch bolt Monitoring switch for field installation
- LXRX2200**.....Latch bolt Monitoring / Request to Exit Combination
