

Replacement Cylinders

Features:

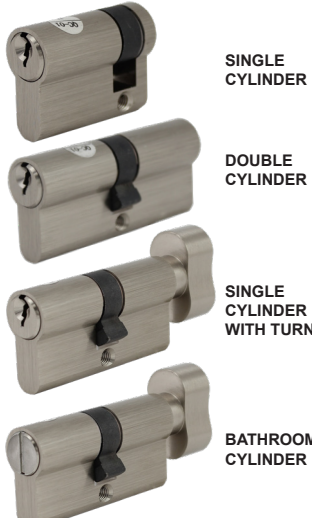

- Made to Original Manufacturers' Keying Specifications
- All Cylinders drilled for 6-Pins
- Can be keyed with original pins
- Packed with appropriate accessories

RESTRICTED KEY CONTROL USING CONVENTIONAL REPLACEMENT CYLINDERS (TIER 3)

Tier 3 Conventional Replacement Cylinders

Provide restricted key control by utilizing the HSK **Patented** key system, without the cost of anti pick drill and bump features. Tier 3 cylinders can be incorporated into HSK Tier 1 & 2 Master Key and Key systems. HSK Tier 1 & 2 keys will work in Tier 3 cylinders however Tier 3 keys will not work in Tier 1 & 2 HSK Cylinders. Tier 3 keys are covered under our patented key system.

Tier 2 High Security Cylinders

Have anti-pick, anti-drill and anti-bump features without the UL 437 Certification. See HSK Section.

Tier 1 (UL 437) High Security Cylinders

Have anti pick, anti drill and anti bump features incorporated and have the UL 437 Certification. See HSK Section.

KEY BLANKS	NOTES	
 <p>KBCRL-6 Key blanks for use with Full Size replacement cylinders</p> <p>KBCRS-7 Key blanks for use with 7PUCCRS Small Format Interchangeable Cores.</p>	<p>Notes</p> <ol style="list-style-type: none"> HSK Tier 1 and 2 Keys will operate with Tier 3 Replacement Cylinders, however the Tier 3 keys will not operate in the Tier 1 and Tier 2 High Security Cylinders. Pinning on Full Size Cylinders (CRL) is the same as Schlage, Pins, Depths & Spacing. No special pinning kits required. For pin spacing, use Scorpion HPC CX5 Card. See page 112 for Scorpion Card. Pinning on SFIC Cores (7PUC) is the same as Best, Falcon, Pins and Depth. No special pinning kits required. Cutting keys will have to be done on code machines or duplicators. These keys cannot be cut on punches. Tier 1, 2 & 3 Mortise Cylinders use the same Cams. To order other cams see HSK Cam Sheet. Optional Rim Pack is also sold separately. Part # is "Rim Pack." (Converts Mortise Cylinder to Rim Cylinder) 	

The CRP Securities High Security Key (HSK) **Patented** System utilizes the innovative Sidebar technology to bring superior and manageable Key Control. Together with distinct keyways and controlled means of key blank distribution, the Sidebar offers a superior level of Key Control Management. Keys can be cut on any standard duplicating and code cutting machines. All cylinders can be master keyed (MK), keyed-alike (KA) and keyed-different (KD). Schlage pins and depths for spacing use HPC CX5 Scorpion Card. On SFIC Cards use Best, Falcon, Pins, Depths and Spacing.

The HSK **Patented** System is designed for use in institutions, schools, hospitals, banks and all commercial and residential applications. The Sidebar series keyway is a proprietary design that is distributed in a controlled manner. Card control is implemented which requires authorized signature for valid duplication. We offer a cost-effective level of security comparable to other expensive high security control systems.

Maximum pick resistance is assured in HSK Systems with the utilization of anti-picking side pins and random mushroom top pins secured by cap screws. Standard cylinders are equipped with 2 hardened steel pins (up to 10 for UL-Listed) in the cylinder plug face for the ultimate in drill resistance. This protects the top and bottom pins and the sidebar from drilling attack.

Shipped as a mortise cylinder this is convertible to a RIM cylinder with the standard RIM pack included with the 1 1/4" and 1 1/8" mortise cylinder. An "Adams Rite" cam is pre-installed on all mortise cylinders. Other cam options are available in the KITS & ACCESSORIES section.

SMALL FORMAT INTERCHANGEABLE CORE (SFIC) CYLINDERS

MEETS
The Buy American Act

The Small Format Interchangeable Core (SFIC) cylinders are comparable to other popular SFIC in the market such as “BEST” when it comes to functionality, but with the added security of the sidebar mechanism. The location of the sidebar mechanism is inside the plug of the core, so there is no need to dismantle it to combine or pin the cylinder.

- ANSI / BHMA A156.30 Certified

MEETS
The Buy American Act

- Commercial and Residential Application
- Meets ADA requirements specially designed for Barrier Free Application
- Exceeds BHMA / ANSI A156.36, Grade 1 requirements
- ADA Ergonomic Thumbturn
- Available as Single or Double Cylinder
- Free turning, wrench-resistant tapered cylinder ring
- 1" (25mm) throw high-strength steel alloy deadbolt with anti-saw
- Steel mounting plate
- TRIM: Wrought Brass or Stainless Steel
- FACE PLATE: Standard 2 1/4" X 1 1/8"
- DOOR RANGES: Adjustable 1 3/8" (40mm) to 2" (51mm) door thickness
- BORE DIAMETER: 1" for latch, 2 1/8" for lock housing
- STRIKE: 1/8" X 2 3/4" square corner
- Extra security 1" throw bolt with 1/4" free spinning anti-cut through pin
- 2 pcs x 3" screws with wood frame reinforcer greatly strengthens door frames

CONTROLLED KEY DUPLICATION AND DISTRIBUTION

High Security key control is a must. Each cylinder comes with duplicate keys, registration card and authorization card. Dealers agree to keep accurate and responsible keying records in accordance with CRP Securities' recording procedures and agree to maintain a key cutting log in which Dealers will enter for each key that it cuts: the date of the key duplication, the name of the person operating the machine, the number of duplicate keys cut, the name of the person to whom the duplicate key is delivered or, if mis-cut, the fact will be recorded and the mis-cut blank will be stored in inventory until it can be counted by CRP Securities personnel and the remaining number of CRP High Security key blanks in Dealer's inventory.

These are just some of the procedures that are enforced to ensure and maintain the high level of security provided by CRP High Security Key System.

<p>AUTHORIZATION CARD</p>		<p>FILE NUMBER</p>
<p><i>Authorized Signatures</i></p>		<p><i>Customer</i></p>
1. NAME _____		COMPANY NAME _____
1. SIGNATURE _____		STREET ADDRESS _____
2. NAME _____		CITY _____ STATE _____ ZIP _____
2. SIGNATURE _____		
DATE _____		

This card serves as an authorization to purchase additional CRP Securities keys and/or locks based on assigned codes. Locksmith must be notified if there are any changes in the signatories on a company letterhead bearing one of the original signatures.

The specified Locksmith hereby authorizes its officers, employees, and agents to accept the authorized signatures appearing on the reverse side of this card to avail of services and products from CRP Securities of sensitive character such as Master Keys, Restricted Keys, Locks, etc. It is the Locksmith's responsibility to extend only under an admissible decision that an authenticated signature on any order in such events has been made by the individual whose signature is the above-mentioned authorized signature.

CRP COMBINATION “COMBI” KEY CONTROL CYLINDER PROGRAM

COMBI is a new key system developed by Cal-Royal Products, Inc. and CRP Securities to resolve key systems using different lock manufacturers’ products to work together. Using patented keyway design, it allows for existing keying systems of different lock manufacturers to be integrated into one keyway, while maintaining existing hierarchy of key control and key combinations.
