

Drilling Template

(3D-DT for CR3D62 & CR3D51
3D-DT2 for CR3D44)

The template inserts differ depending on hinge size and they must be ordered separately.

Item #:

3D-62TI - Template Inserts for CR3D62

3D-51TI - Template Inserts for CR3D51

3D-44TI - Template Inserts for CR3D44

MAIN FEATURES:

The drilling template, which comprises a frame and two inserts, enables implementation of two slots for the invisible hinges, and is made of 5 mm thick alu-minium plates.

The strength of the materials guarantees precise execution of the slots with a manual pantograph (16 mm diam. cutter and 27 mm external ring provided for all manual pantographs).

For each hinge model, two types of insertions (easily replaceable) are used: one (A) to execute the butt slots and the other (B) for the internal depth slot. The equipment is completed with: Extension arms (C) With a nylon ring (D), they allow to establish the de-sired distance between slots on the door - both left and right - and on the frame.

* Blocking clamps

Very important for the correct use and assembly of the insert.

The reference is printed on the template and the code is printed on the same side of the inserts.
