

INSTALLATION INSTRUCTIONS

EJHIL Series - Touchscreen Electronic
Interconnected Lock with Clutch locking mechanism

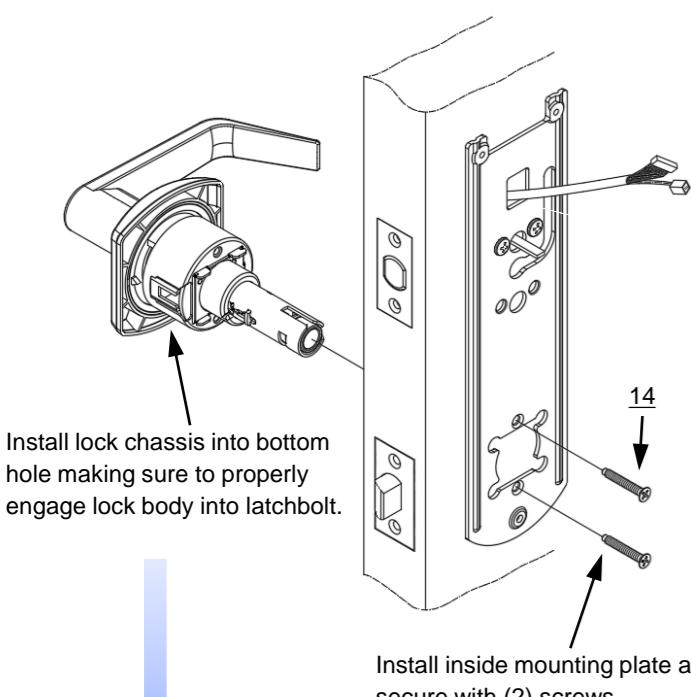

IMPORTANT NOTES

DO NOT use a power drill for installation

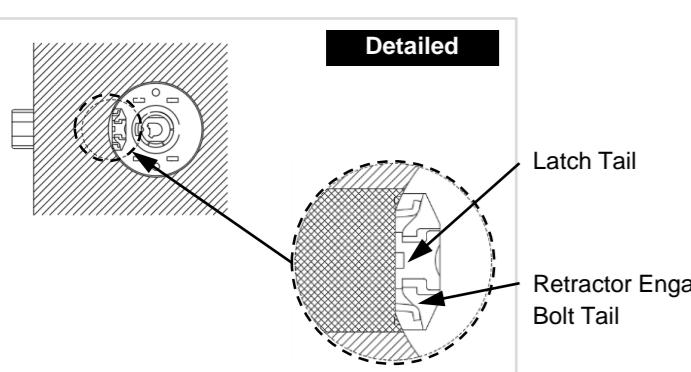

- Install and test lock with door open to avoid being locked out.
- Please use four alkaline batteries for the best performance.
- Read the precautions and instructions in this manual before installing and using this lock. Save this manual for future reference.

4. Install the bottom part of the lock.

A. Install the handing plate into the lever assembly.

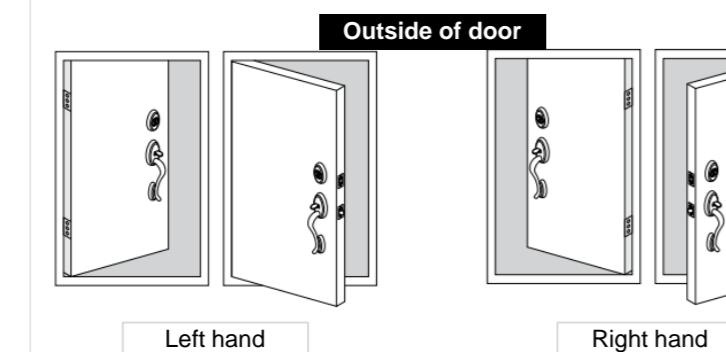

Install inside mounting plate and secure with (2) screws

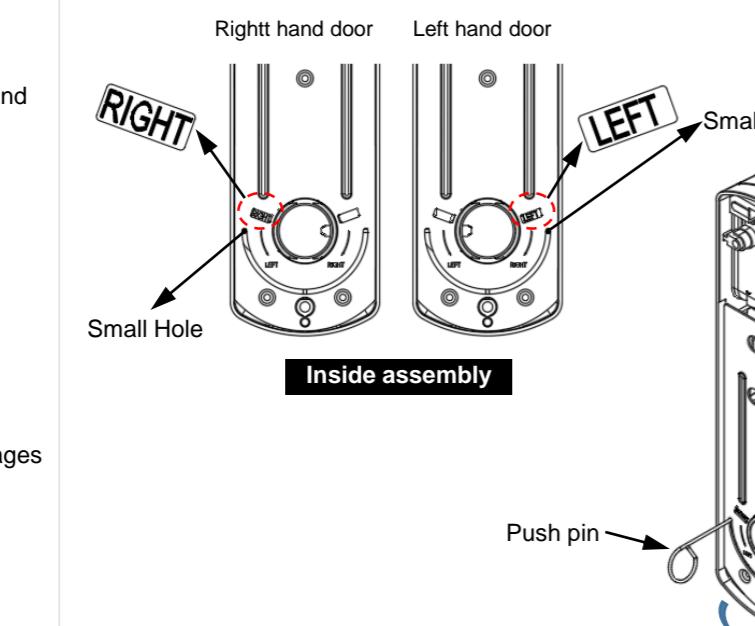

5. Determine the Handing

Determine the handing of your door.

6. How to change Door Hand

- The standard setting from factory is for right-hand door.
- Check right-hand or left hand.
- Insert push pin provided into a small hole at the end of semicircle as shown on following diagram.

Pre-installation Hardware

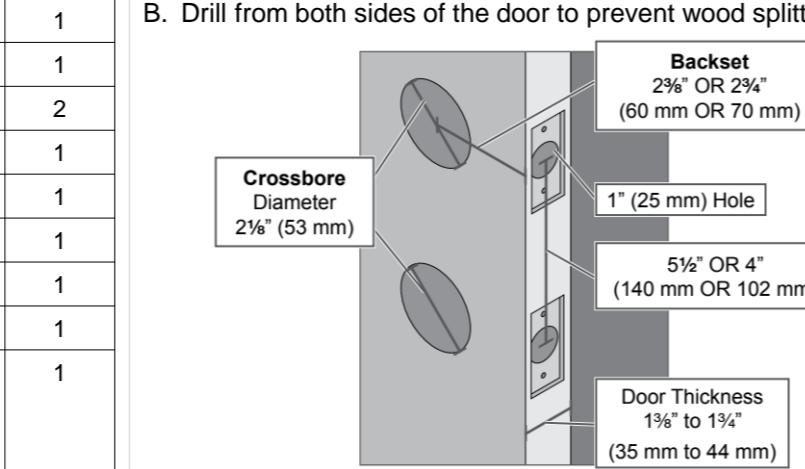

Part	Description	Quantity
1	Deadbolt	1
2	Latch	1
3	Outside deadbolt assembly	1
4	Outside lever assembly	1
5	Inside assembly	1
6	Battery Cover	1
7	Mounting Plate	1
8	Lever	2
9	Deadbolt Strike	1
10	Deadbolt Strike box	1
11	Reinforcement plate	1
12	Latch Strike	1
13	Latch Strike box	1
14	Screw Pack	1
	• (8) 8-32x3/4"(19mm) Combination Screw	
	• (2) 1/4"x28x2"(50.8mm) Mounting Bolt	
	• (2) 10-32x1-13/32"(36mm) Mounting Bolt	
	• (2) Reinforcer with 3"(76mm) Wood Screw	
	• (2) M4.0xP0.7-15/32"(12mm) Inside assembly Bolt	
	• (1) M5.0xP0.8-3/5"(15mm) Inside assembly Bolt	
15	AA Alkaline Batteries	4
16	Battery Cover Screw	1
17	Lever pin	1

Prepare for installation

1. Check door dimension

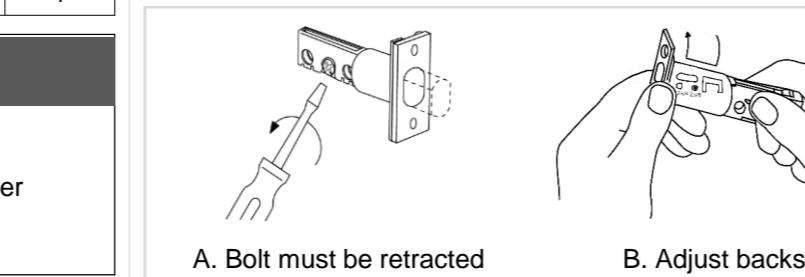

TEMPLATE and use to mark the door, drill holes, and chisel out the mortise.

- If your door is pre-drilled, check the hole sizes to make sure they are the proper size. If they are the proper size, skip to the Installation section.
- Drill from both sides of the door to prevent wood splitting.

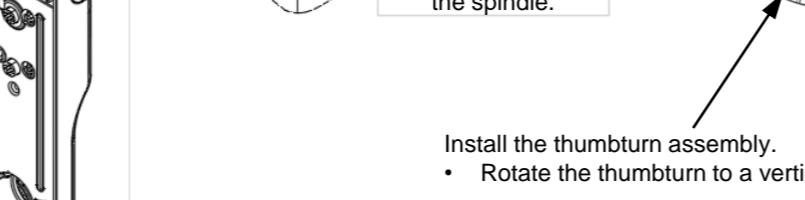

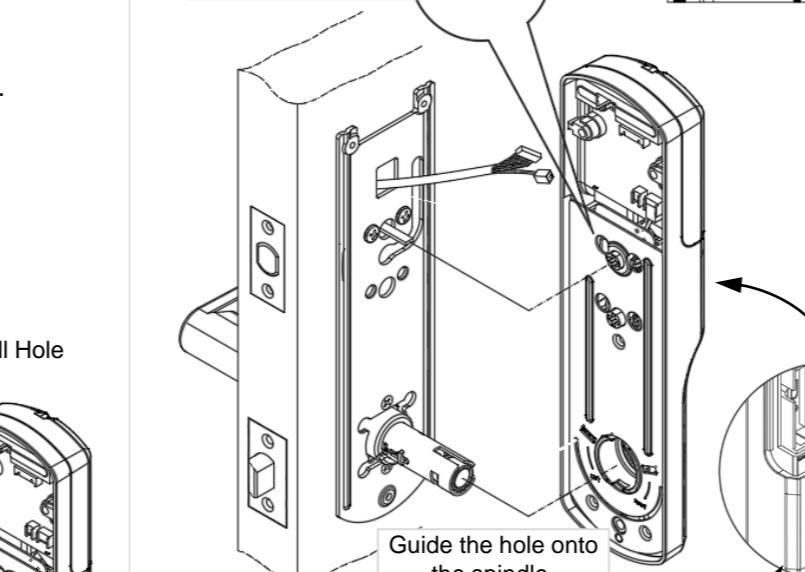

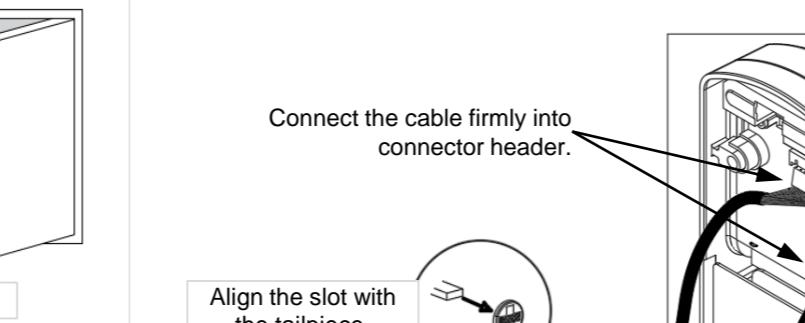

2. Adjust bolt length, if necessary

- If the backset of your door is 2-3/8"(60mm), you need to adjust your bolt.
- Press on the bolt with thumb. Rotate faceplate and push down to move housing to next position.

7. Install the Inside assemblies.

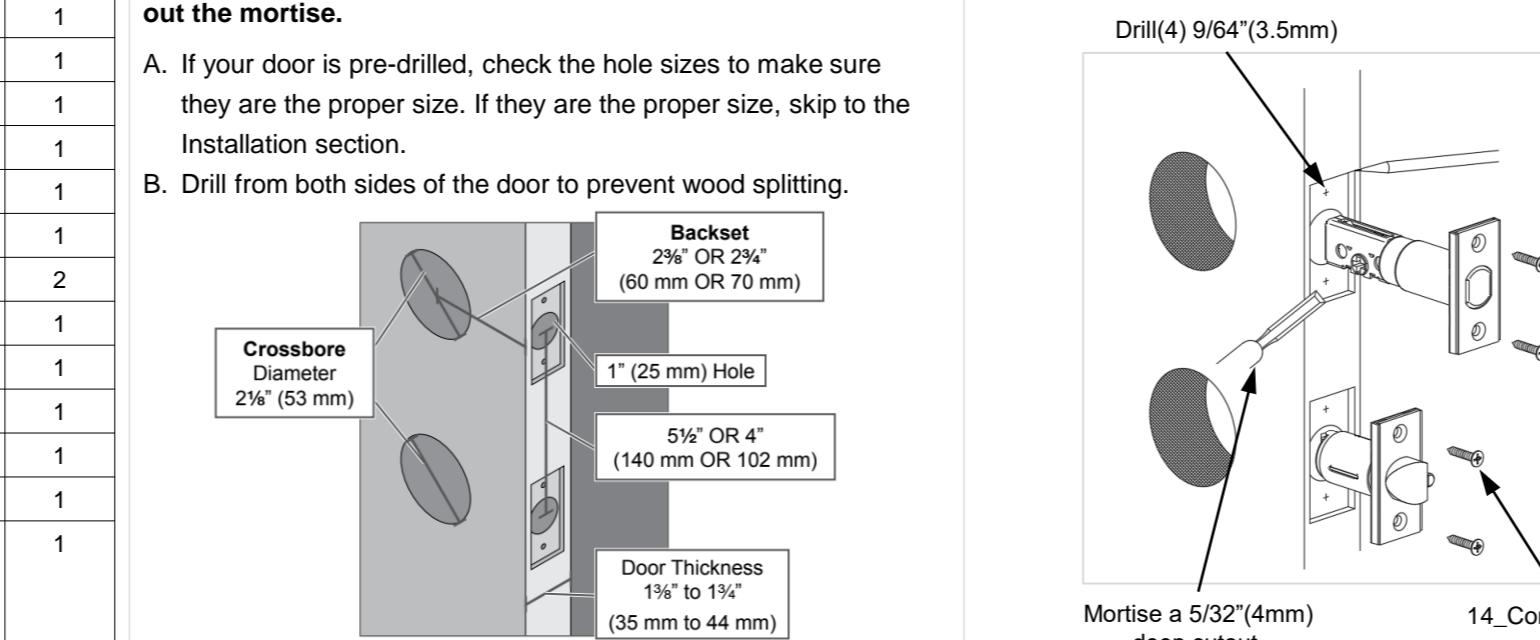

A. Connect the cable to the inside assembly.

Install the Lock

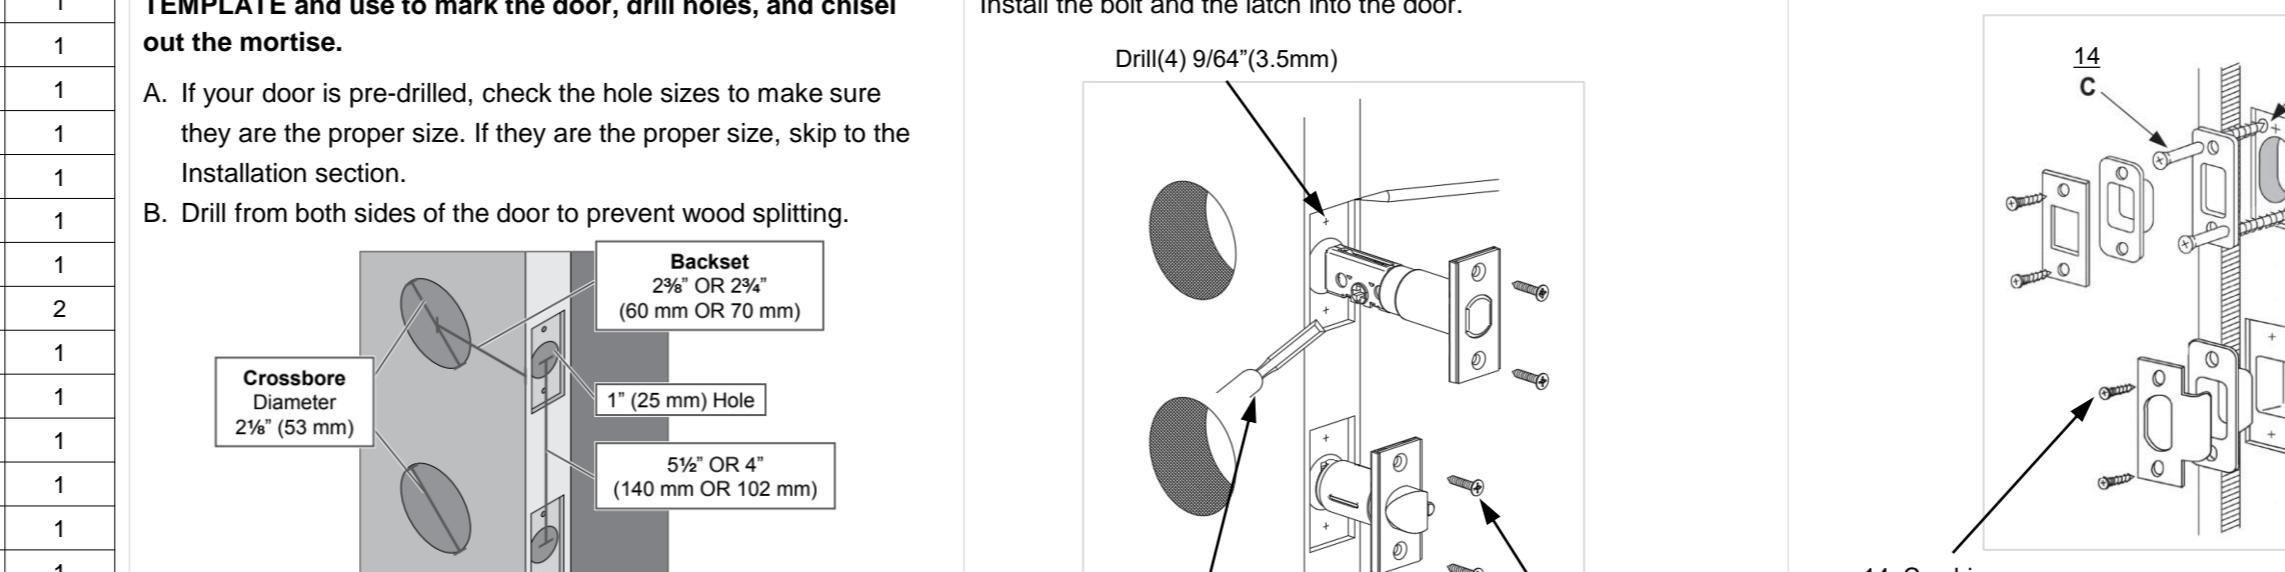

1. Install the bolt and latch.

Install the bolt and the latch into the door.

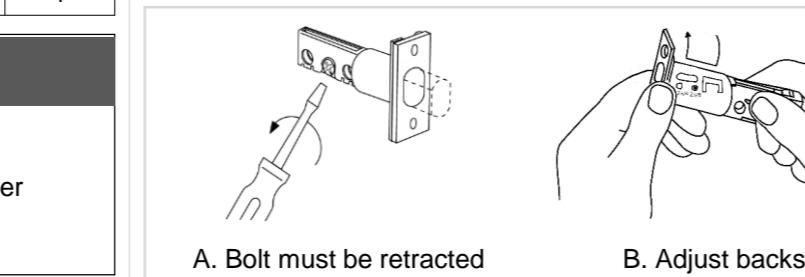

2. Install the strikes.

Install the strikes into the frame.
★ **Install all the parts shown for maximum security.**

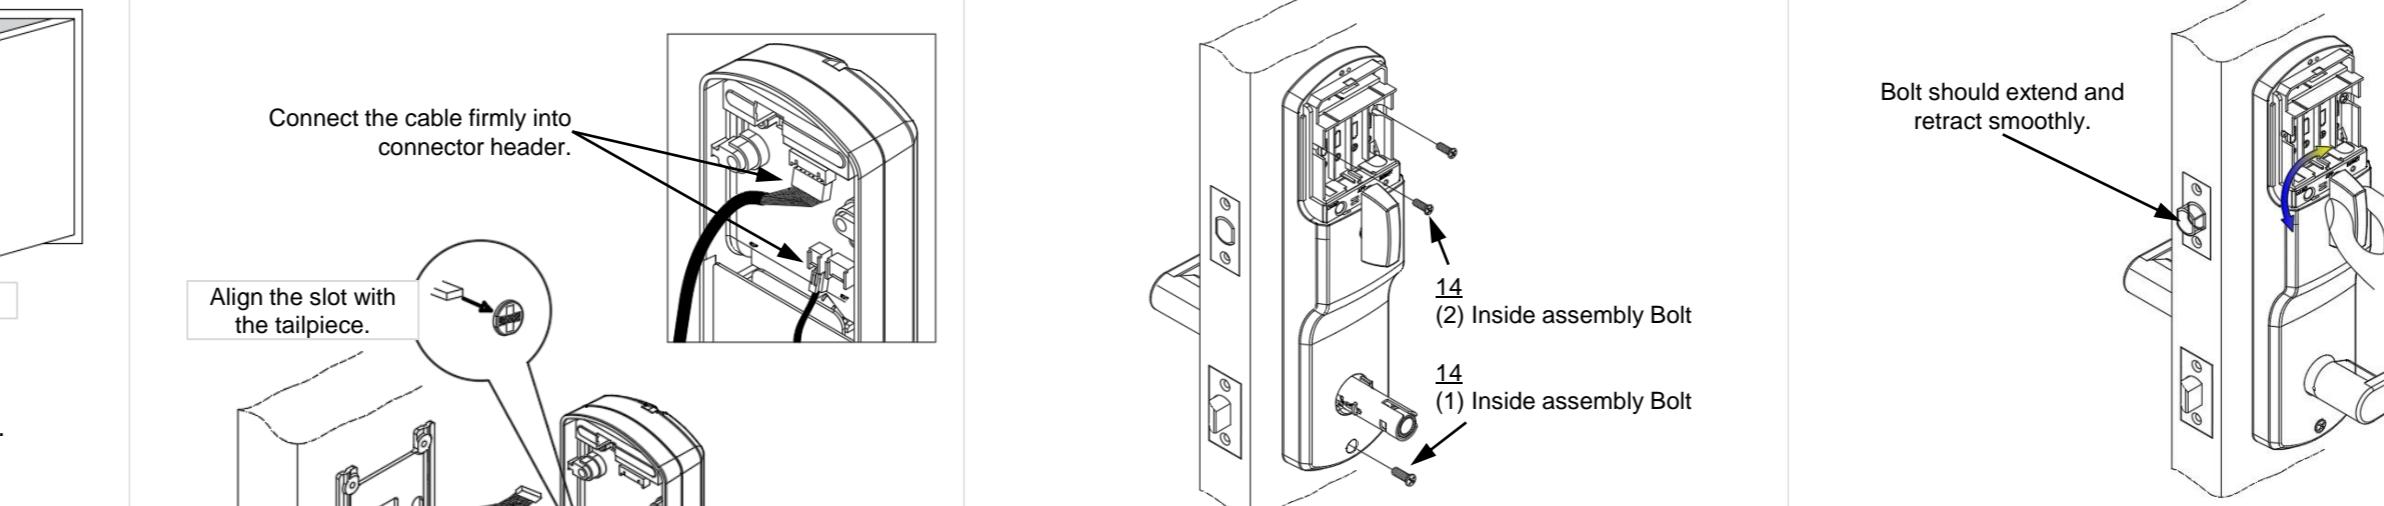

14_Combi-screw

- Insert bolt and latch into hole. Trace around faceplate.
- Chisel out wood until faceplate fits flat with door edge.
- Install reinforcer with 3"(76mm) wood screw.
- Install strike box and strike.

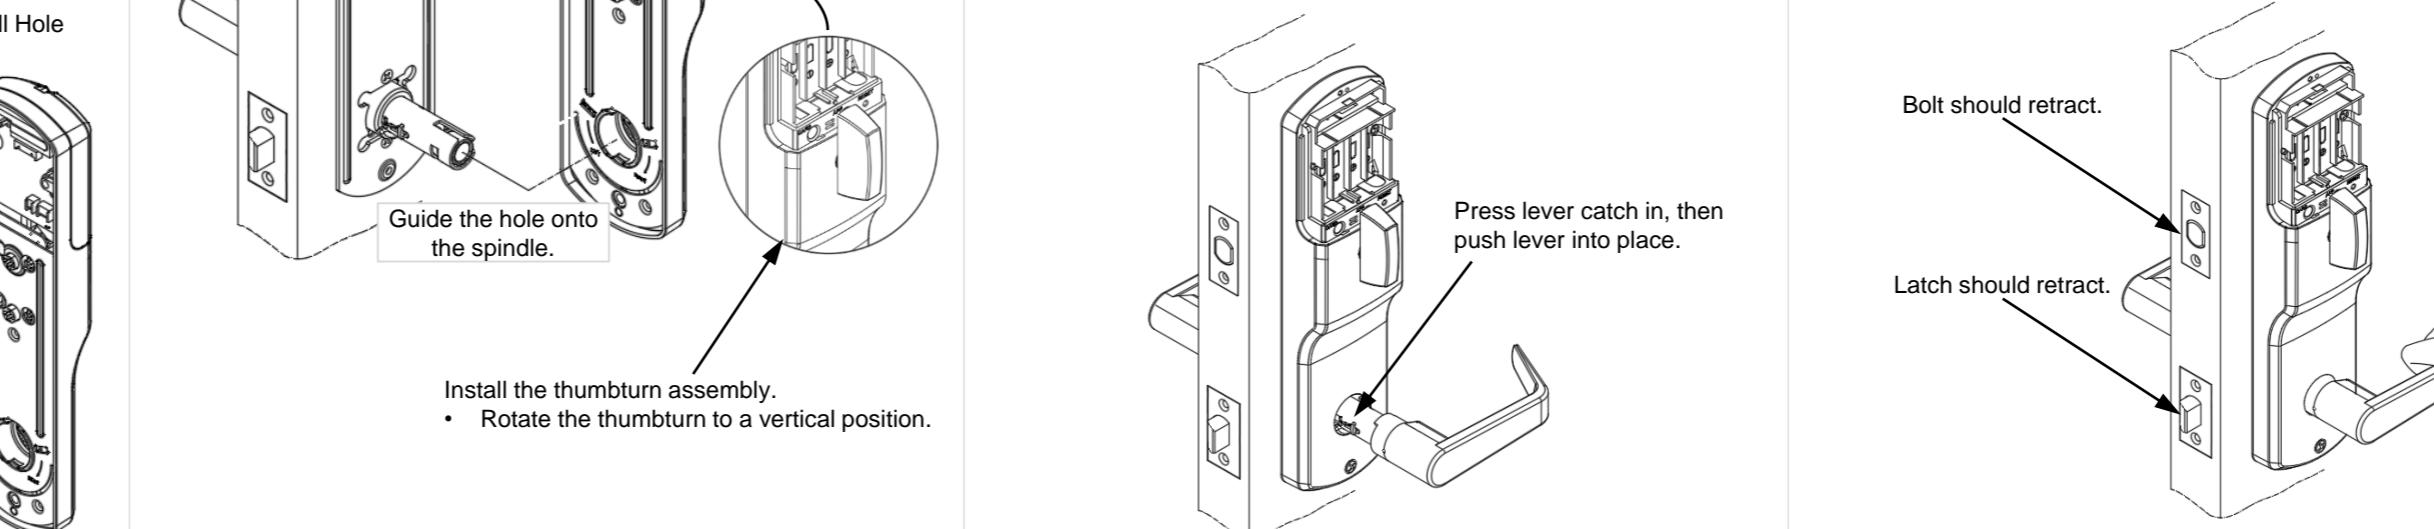

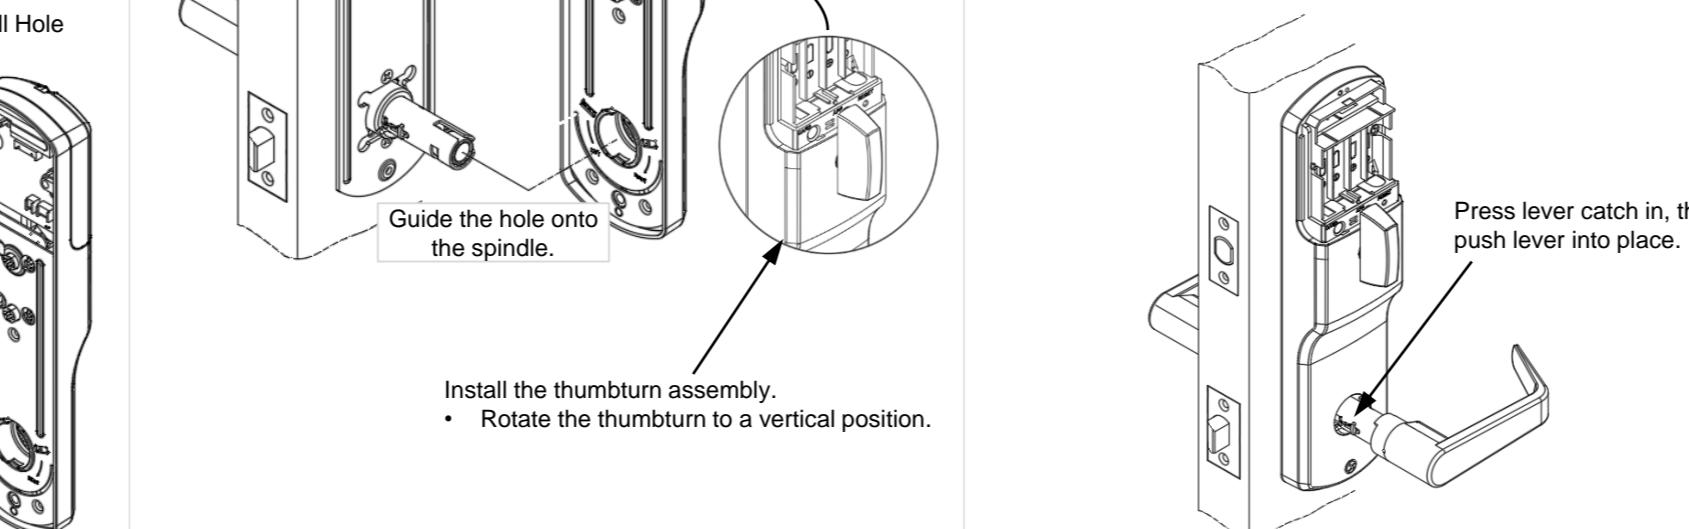

9. Test the lock

A. Extend and then retract the bolt using the inside bolt throw.

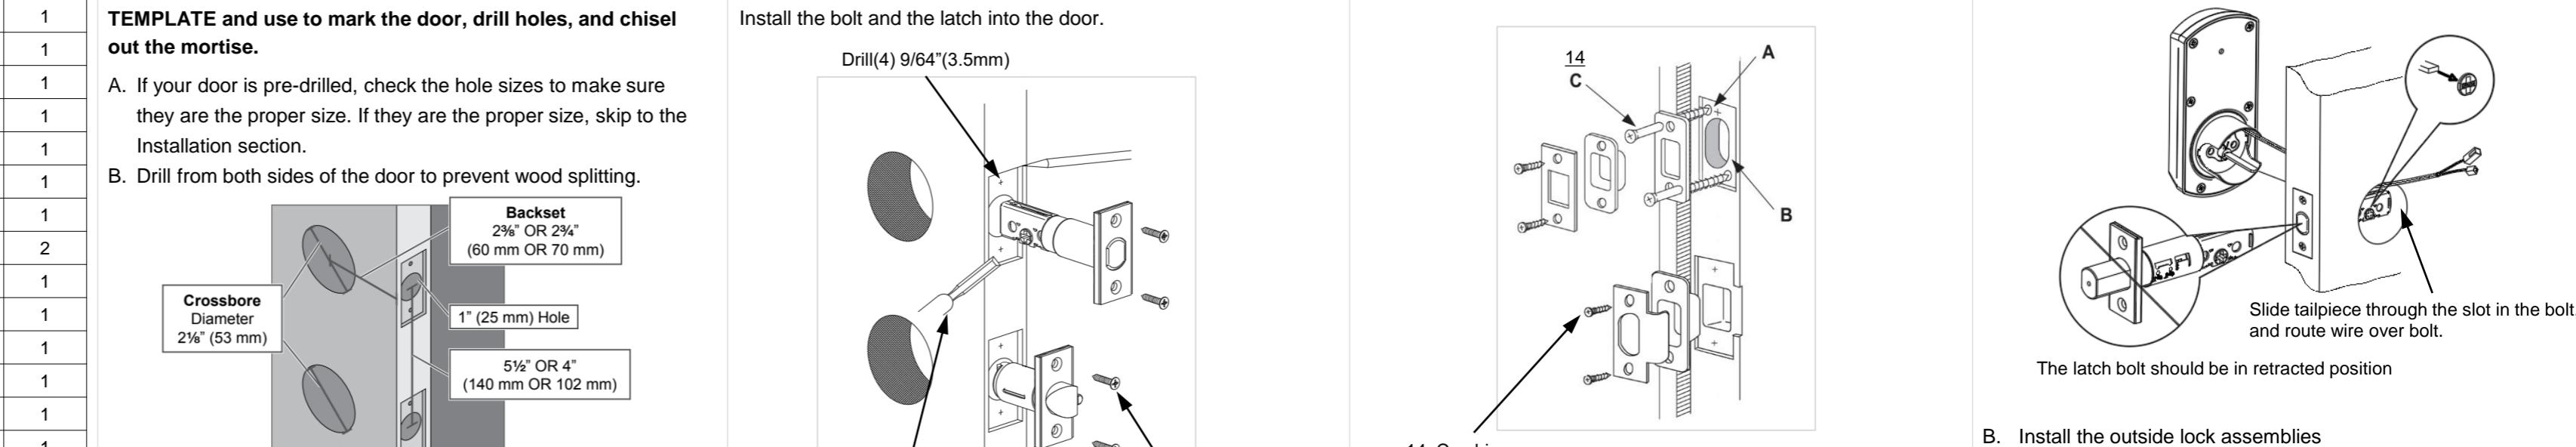

8. Install the lever.

Install the lever on the inside of the door.

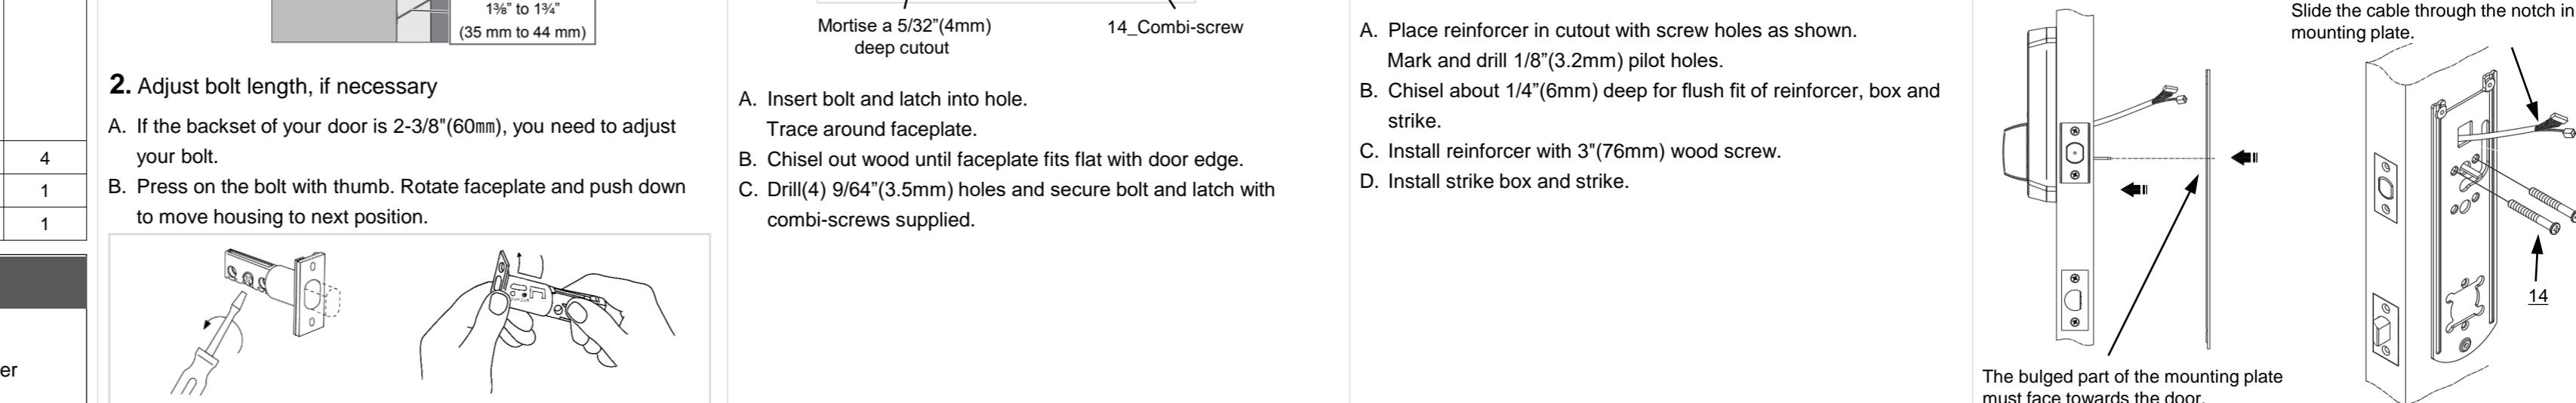

3. Install the top part of the lock.

A. Install the outside deadbolt assembly on the outside of the door.

The latch bolt should be in retracted position

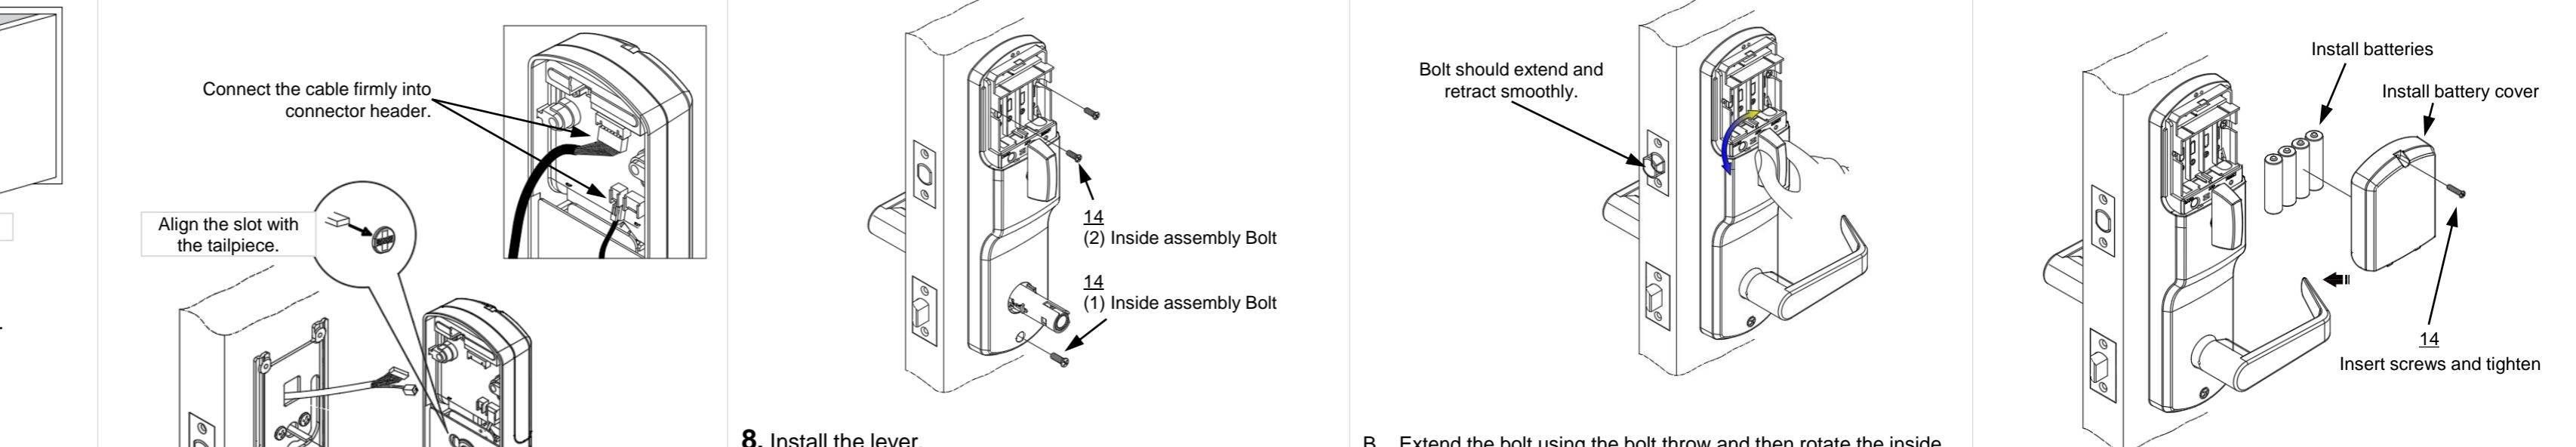

B. Install the outside lock assemblies

The bulged part of the mounting plate must face towards the door.

10. Install the batteries and Cover.

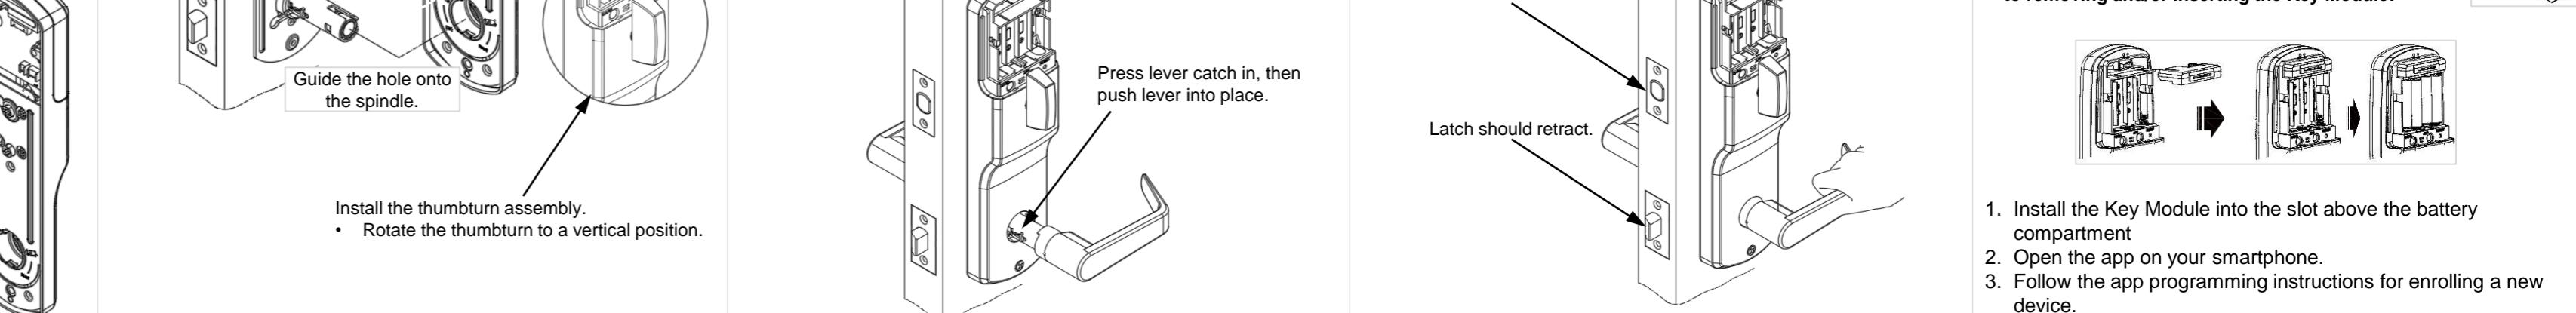

Please use four alkaline batteries for better performance.

11. Installation Option

Adding the Key Module to your lock(optional)

★ **IMPORTANT: The batteries must be removed prior to removing and/or inserting the Key Module:**

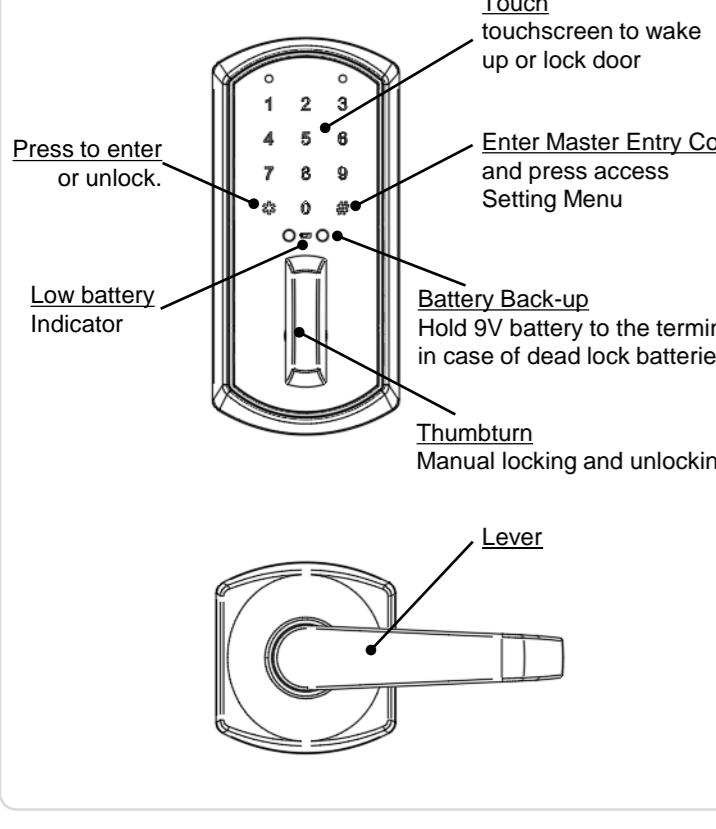

- Install the Key Module into the slot above the battery compartment
- Open the app on your smartphone.
- Follow the app programming instructions for enrolling a new device.

PROGRAMMING GUIDE

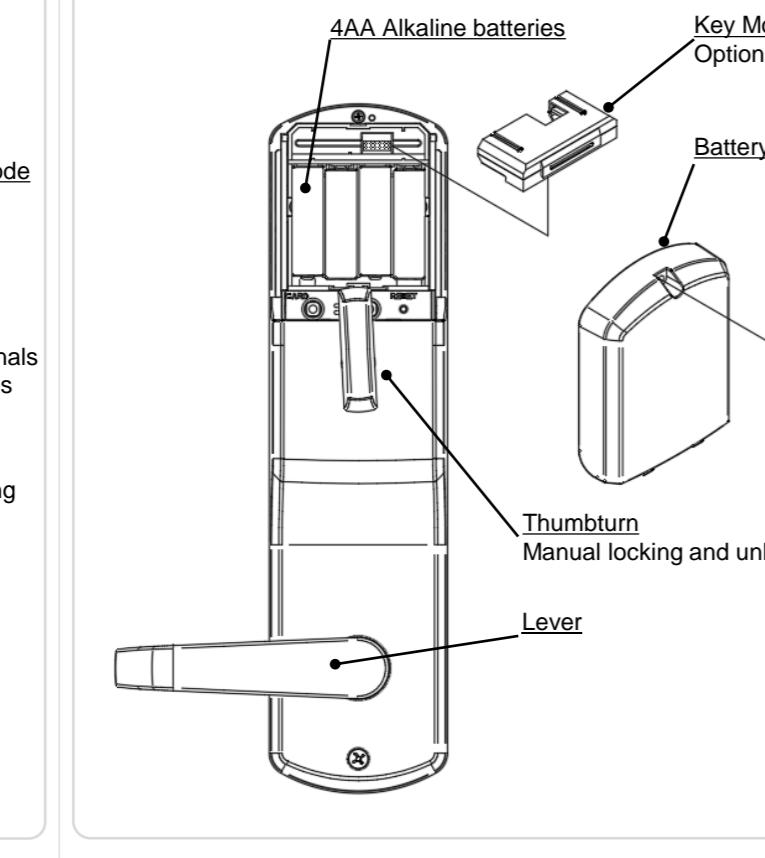

Take the time to read through this guide to familiarize yourself with the features and operation of the lock, and its quick and easy programming procedures.

Programming Features

Touchscreen Escutcheon

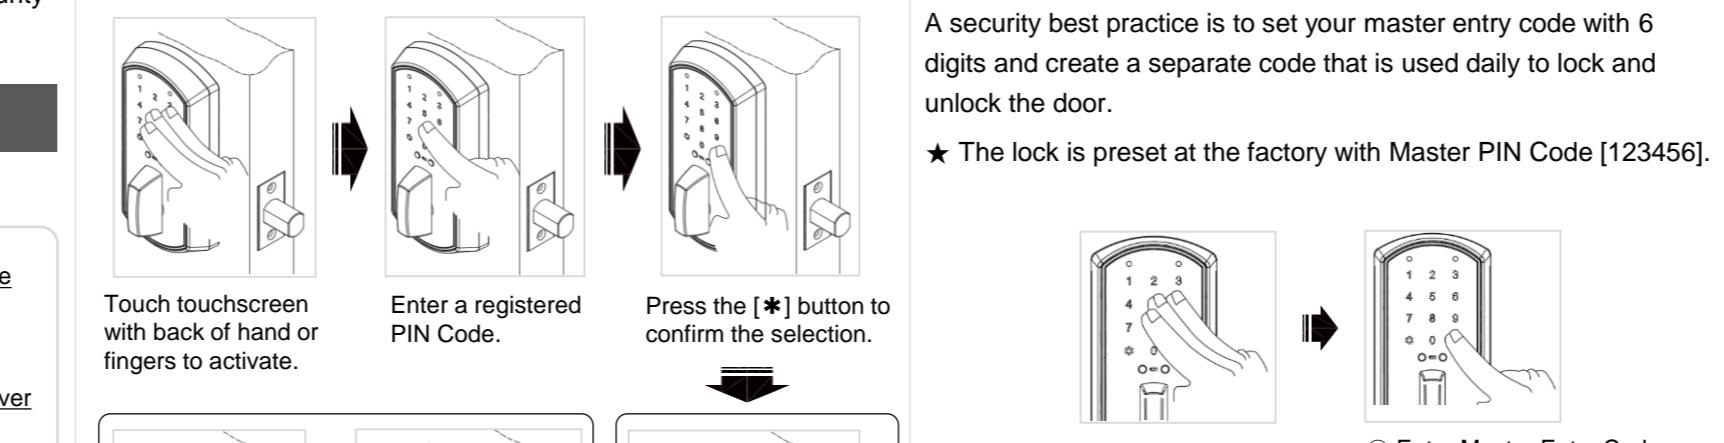

Inside Escutcheon

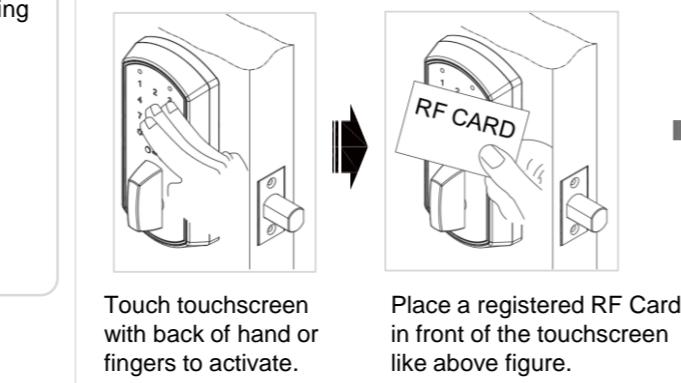

Operation of lock

1. Opening the door with a Pin Code.

Factory Default : 123456

2. Opening the door with a RF Card.

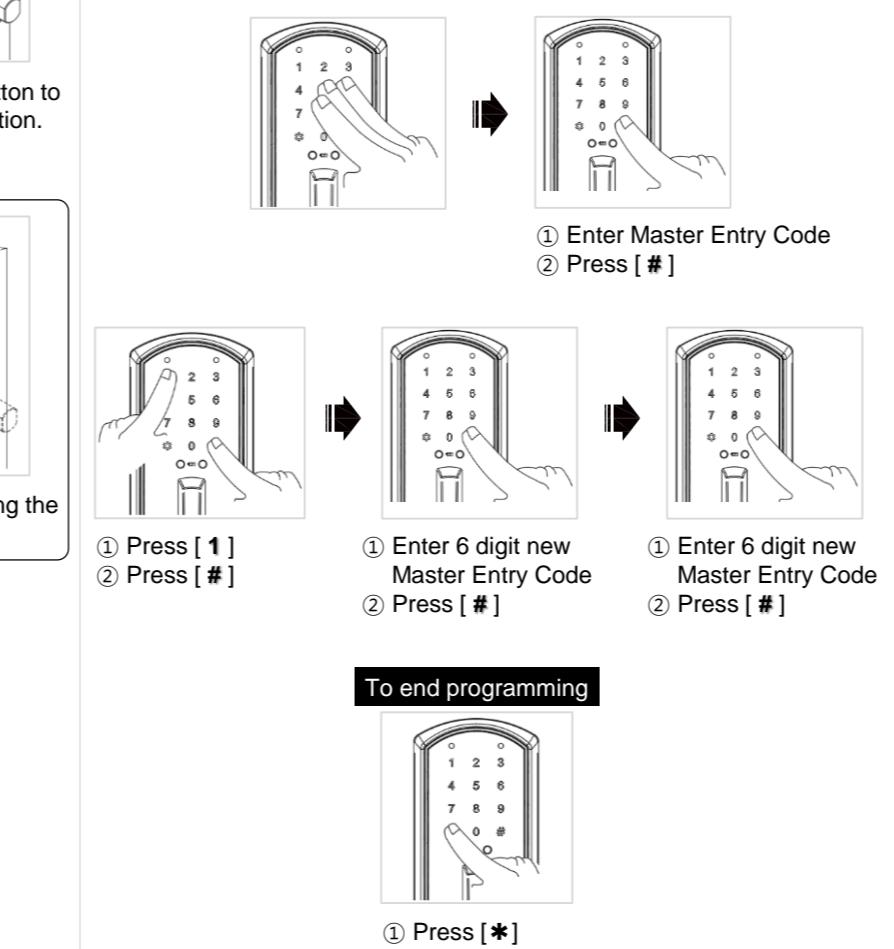

Programming

1. Change Default Master Entry Code

The master entry code is used to change the lock settings. A security best practice is to set your master entry code with 6 digits and create a separate code that is used daily to lock and unlock the door.

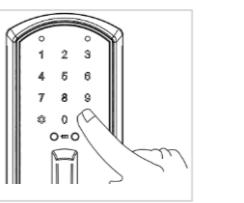

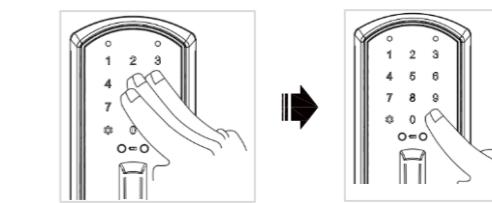

★ The lock is preset at the factory with Master PIN Code [123456].

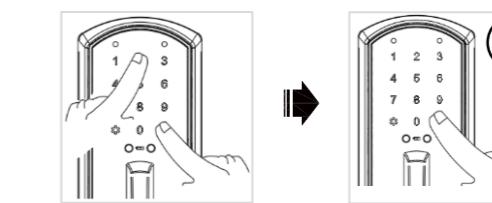

2. Creating Entry User Codes

Master entry code must be changed first.

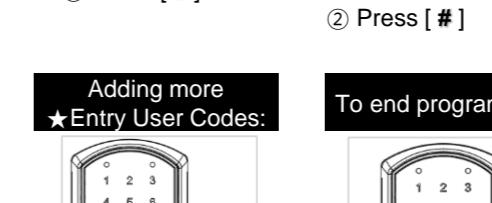

★ Max Entry User Code = 500

① Enter Master Entry Code
② Press [#]

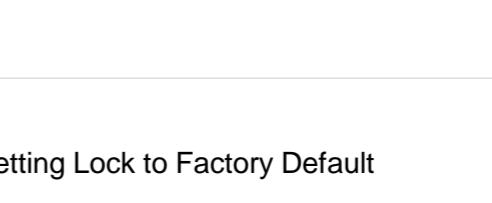

① Enter Master Entry Code
② Press [#]

① Enter 4-6 digit Entry User Code
② Press [#]

① Enter 4-6 digit Entry User Code
② Press [#]

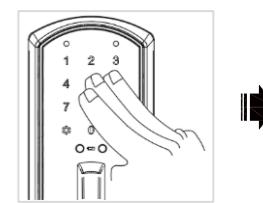

① Enter 4-6 digit Entry User Code
② Press [#]

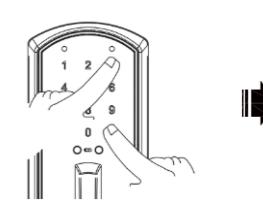

3. Deleting Entry User Codes

3. Deleting Entry User Codes

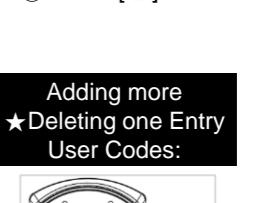

To delete one Entry Code, you must enter the Entry Code you wish to delete. Enter 4-8 digit entry code.

① Enter Master Entry Code
② Press [#]

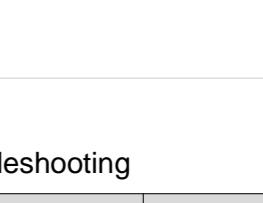

① Enter Master Entry Code
② Press [#]

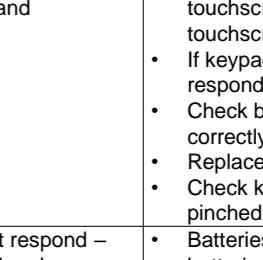

① Press [3]
② Press [#]

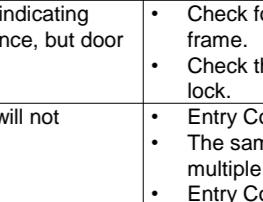

① Press [3]
② Press [#]

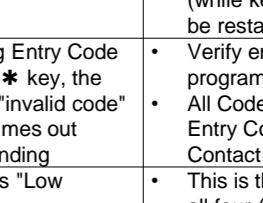

① Press [3]
② Press [#]

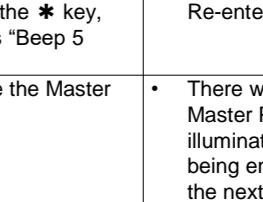

① Press [3]
② Press [#]

① Press [3]
② Press [#]

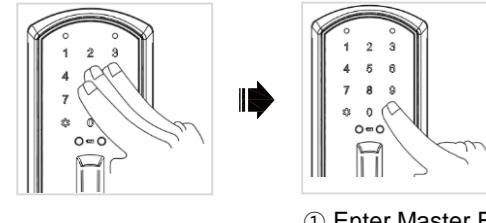

① Press [3]
② Press [#]

① Press [3]
② Press [#]

4. Customizing Lock Using Settings Menu

① Enter Master Entry Code
② Press [#]

★ Enter digit corresponding to the function to be performed followed by the # button.

4 One-Time User Code

4 # → Enter 4-6 digit Entry User Code # → # → *

5 Setting Up/Releasing Passage Mode

5 # → 1 Enable *
3 Disable *

★ Another method to disable Passage Mode:

Enter Master Entry Code # → 5 *

7 Setting Up/Releasing Lockout Mode

7 # → 1 Enable *
3 Disable *

8 Setting Up/Releasing Lockout Mode

0 # → 1 Volume # → 1 ~ 4
3 Re-lock Time # → 1 sec ~ 9 sec *

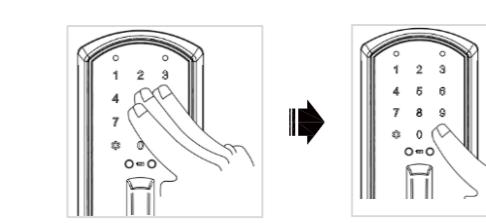

★ Sound Volume: 1 [minimum] ~ 3 [maximum] 4 [mute]

★ Here is an example of how to set Auto Lock to 9 seconds : Enter Master Entry Code # 0 # 3 Re-lock Time # 5 *

5. Creating RF Cards

Master entry code must be changed first.

★ Max Entry User Code = 500

① Enter Master Entry Code
② Press [#]

★ Enter digit corresponding to the function to be performed followed by the # button.

4 One-Time User Code

4 # → Enter 4-6 digit Entry User Code # → # → *

5 Setting Up/Releasing Passage Mode

5 # → 1 Enable *
3 Disable *

★ Another method to disable Passage Mode:

Enter Master Entry Code # → 5 *

7 Setting Up/Releasing Lockout Mode

7 # → 1 Enable *
3 Disable *

8 Setting Up/Releasing Lockout Mode

0 # → 1 Volume # → 1 ~ 4
3 Re-lock Time # → 1 sec ~ 9 sec *

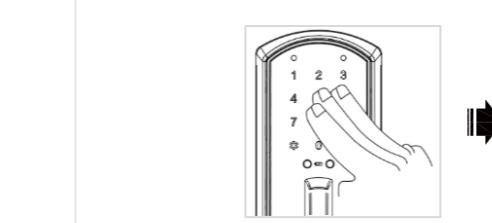

★ Sound Volume: 1 [minimum] ~ 3 [maximum] 4 [mute]

★ Here is an example of how to set Auto Lock to 9 seconds : Enter Master Entry Code # 0 # 3 Re-lock Time # 5 *

6. Deleting RF Cards

Master entry code must be changed first.

★ Enter digit corresponding to the function to be performed followed by the # button.

① Enter Master Entry Code
② Press [#]

★ Enter digit corresponding to the function to be performed followed by the # button.

4 One-Time User Code

4 # → Enter 4-6 digit Entry User Code # → # → *

5 Setting Up/Releasing Passage Mode

5 # → 1 Enable *
3 Disable *

★ Another method to disable Passage Mode:

Enter Master Entry Code # → 5 *

7 Setting Up/Releasing Lockout Mode

7 # → 1 Enable *
3 Disable *

8 Setting Up/Releasing Lockout Mode

0 # → 1 Volume # → 1 ~ 4
3 Re-lock Time # → 1 sec ~ 9 sec *

★ Sound Volume: 1 [minimum] ~ 3 [maximum] 4 [mute]

★ Here is an example of how to set Auto Lock to 9 seconds : Enter Master Entry Code # 0 # 3 Re-lock Time # 5 *

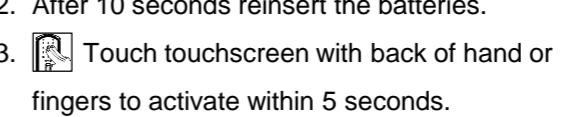

7. Setting Definitions

Settings	Default Setting	Definition
Master Entry Code	123456 [6 digit]	The Master Entry Code is used for programming and for feature settings. The Master code will also operate (unlock/lock) the lock.
User Code	4-6 digits	The User PIN code is used for operating the lock.
One-Time User Code	4-6 digits	This PIN Code can only be used once and the PIN information is deleted automatically after use. User can program in up to 2 different One-Time User PIN Codes.
Lockout Mode	Disabled	his feature is enabled by the Master Entry Code. When enabled, it restricts all Entry Code access (except Master). When attempting to enter a code the lock is in Lockout Mode, the RED will appear on the screen.
Auto Re-lock	5 Seconds	When enabled, After successful code entry and the unit unlocks, it will automatically re-lock after 1-9 seconds.
Low Battery	Red LED	When battery power is low, the low battery icon will begin blinking. If battery power is completely lost, the key cylinder can be used.
Beep Sound	2 levels	The Beep Sound can be turned on/off if desired.
Shutdown Time	60 Seconds	The Lock will shutdown (flashing RED) for sixty(60) seconds and not allow operation after the wrong code entry limit (5 attempts) has been met.
Wrong Code Entry Limit	5 Times	After five (5) unsuccessful attempts at entering a valid Entry Code, the lock will shut down and not allow operation for sixty (60) seconds.

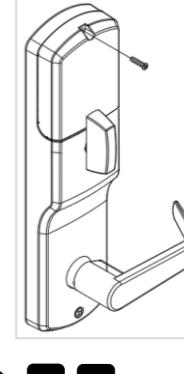

8. Resetting Lock to Factory Default

1. Remove the battery cover and batteries.

2. After 10 seconds reinsert the batteries.

3. Enter the [#] button 5 times and factory defaults Master Code [123456] [#] and [30] [#] and press the [1] [*] button.

5. A little later, the number pad is turned off and reset is complete.

Note:

All registered Master and User PIN Code data, etc., will be deleted, and the lock will reset to the factory default.

9. Battery Replacement

When battery power is low, the low battery icon will begin blinking with beep sound. Always replace weak batteries as soon as possible. The locks use four (4) AA-size 1.5 volt alkaline batteries.

10. Troubleshooting

Symptom	Suggested Action
Lock does not respond – door is open and accessible.	<ul style="list-style-type: none"> Keypad becomes active when touch touchscreen is pressed. Verify contact with the touchscreen. If keypad numbers are visible, check they respond when pressed. Check batteries are installed and oriented correctly (polarity) in battery case. Replace batteries* if batteries are dead. Check keypad cable is fully connected and not pinched.
Lock does not respond – door is locked and inaccessible.	<ul style="list-style-type: none"> Batteries may not have enough power. Replace batteries. Apply a 9V battery to terminals front the keypad for backup power option.
Lock beeps indicating code acceptance, but door will not open	<ul style="list-style-type: none"> Check for any foreign objects between door and frame. Check that cable is firmly connected to inside lock.
Entry Codes will not register	<ul style="list-style-type: none"> Entry Codes must consist of 4 to 6 digits. The same Entry Code cannot be used for multiple users. Entry Codes are set by the Master Entry Code, which is set first. Contact the Master user. Entry Codes must be entered within 10 seconds (while keypad is active) or process will have to be restarted.
Upon entering Entry Code and pressing * key, the lock displays "invalid code" error or lock times out without responding	<ul style="list-style-type: none"> Verify entered code is a valid, previously programmed, 4 to 6 digit code. All Code Lockout is enabled. Only the Master Entry Code can change All Code Lockout. Contact the Master user.
Lock responds "Low Battery"	<ul style="list-style-type: none"> This is the alert to replace the batteries. Replace all four (4) batteries* with new AA Alkaline batteries.
Upon entering Entry Code and pressing the * key, lock responds "Beep 5 time"	<ul style="list-style-type: none"> The digits entered were incorrect or incomplete. Re-enter the correct code followed by the * key.
I can't change the Master Entry Code.	<ul style="list-style-type: none"> There was a delay while entering the new Master PIN Code. The number pad must be illuminated while the new Master PIN Code is being entered. Also, after entering the first digit the next digit must be entered within 10 seconds. If batteries are discharged, try again after replacing the batteries. Refer to the changing the Master PIN Code section in the programming instructions and try changing again.
