BLUE - NORMAL OPEN (NO)  
GRAY - NORMAL CLOSED (NC)

### TOOLS REQUIRED

Philips Screw Driver

1. Remove Exit Device End Cap.

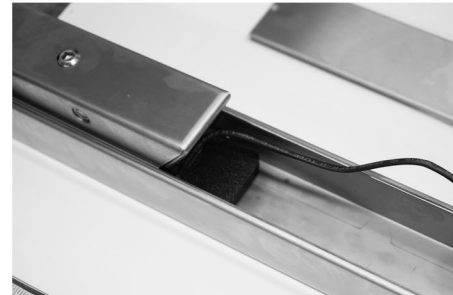

2. Slide and remove the shim from the body.

3. Prepare the RX-switch, hold it in this position and remember the phrase "slide and click".

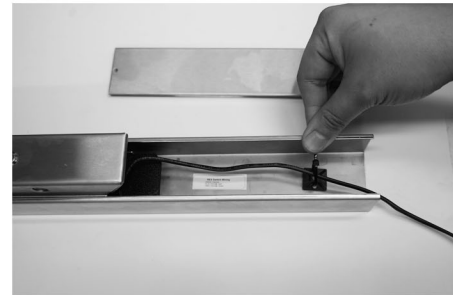

4. Make sure the bracket tab clips to the base of the push bar assembly.

5. Test and check the function of the RX-switch..

6. Flip the shim cover and attach the Label Sticker and Cable tie mount using its pre-installed double sided adhesive.

7. Secure the RX-switch wire using the Cable tie, for wire management.

8. Re-insert the shim by sliding it back in place to the Exit Device body. Then check the function of the RX-switch.

9. Re-install the End Cap of the Exit Device.

10. Fasten the (2) screws to the End Cap.
