Power.....	4 x 1.5VDC (AA Batteries included)
Finishes.....	Silver, Dark Bronze, Gold

The Electronic Digital Door Viewer (ELECDDV180) is an innovative product designed to replace conventional peephole door viewers with an electronic video system that delivers on-demand and high quality images. This avoids caller from the outside to see any movement from the inside when they come knocking. Unwanted callers can be ignored or screened without them knowing there are people inside. Ensures your privacy is protected.

The ELECDDV180 provides an expanded field of view from a comfortable viewing distance. It is fast and easy to install into new construction or retrofitted to existing doors and requires no external wiring. The 3.5 inch LCD monitor mounts on the inside of the door and provides a large, clear view. The high resolution color camera is mounted into the door and delivers a sharp image.

A simple press of a button produces a live video image of the entire area outside of the door and is displayed on the LCD monitor. The ELECDDV180 installs in just a few minutes using a standard power drill. The battery life is approximately 1500 X 15-second viewing cycles. In normal operation, the batteries last for one year.

The ELECDDV180 adds value to your home, condo or apartment units not only for its high-tech appeal but also for the added security and precaution you can take compared to conventional door viewers.

It comes in Gold, Silver and Dark Bronze finishes to complement or match the finishes on your door and/or door hardware.
